

General: What is CERTivity KeyStores Manager?

CERTivity[®] is a powerful pure Java multi-platform visual KeyStores manager. This standalone GUI desktop application provides a natural experience for managing and using KeyStores, Certificates, KeyPairs (Private Key, Certificates Chain), Secret Keys in various formats. It covers and combines functions that otherwise are available through verbose command line tools or other operating system tools or browsers.

Thus developers and system administrator can gain valuable time and ensure the greatest productivity by letting CERTivity taking care of the low level details in a uniform manner on almost all the systems - Windows, Unix/Linux, Mac.
